

MAY

ECUADOR

Naturalists are in for a real treat with a tour to the Galápagos Islands. Known as the birthplace of evolution, you'll follow the footsteps of Charles Darwin's research when you snorkel with tropical fish, venture through lava tunnels and spot different species of finches and tortoises on these incredible islands. **See it all on our fun-filled Galápagos Islands tour:**

Established by American Tortoise Rescue in 2000, **World Turtle Day — May 23** — encourages citizens to support the conservation of all species of turtles and tortoises. The Galápagos Tortoise, from which the islands get their name, is the largest living species of tortoise, and can live well over 100 years, making them a favorite for tortoise enthusiasts.

Watch the Galápagos Tortoise take a (slow) walk on a tour of the islands.
